- Get closer to the machines and systems in operation

In all the areas highlighted by this sign, access is granted only with explicit authorization and always accompanied by LLL staff

Smoking is not allowed inside the establishment

The use of open flames and any other source of ignition is forbidden

It is forbidden to photograph the premises, goods and people without authorization from the Management

Inside the production unit it is forbidden to wear shoes with heels or open, fluttering clothing (e.g. scarves, ties, pendant jewelry)

## SAFETY PROCEDURES FOR ACCESS TO THE COMPANY

The purpose of this flyer is to provide all the important information regarding the rules of conduct, safety and emergency of our Company.

Please read it carefully and follow the instructions provided, take it with you for the period of your visit and return it before leaving the establishment.

## REGISTRATION

Register on arrival at the Reception:

- qualify by indicating your name, the company to which you belong and the name of the desired person.
- Register on the appropriate access program using a QR-code and take the identification badge
- wait for the contact person
- at the end of the visit, return the badge and register the exit on the access program using a QR-code

## EMERGENCY PROCEDURES

The emergency plan is displayed inside the plant where escape routes and location of fire-fighting vehicles are reported.

In the event of evacuation of the plant, signaled by an acoustic siren, it is necessary:

- Suspend all ongoing activities and, if possible, turn off or secure the equipment you are working with.
- Evacuate safely by going through escape routes to the nearest emergency exit.
- Reach the collection point located in the courtyard next to the plant and follow the instructions given by the emergency personnel.
